Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Applicant's amendment and the arguments, filed May 31, 2005, have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, the arguments are moot in view of a new ground(s) of rejection. A non-final office action follows as below.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 2-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The exact meaning of the phrase "a ring insert secured to an end of said end section" (claim 2, lines 13-14) is not clearly understood. It is understood that the "end cap" being connected to the "end section" (line 3), but it is not clearly understood as to how the "ring insert" is secured at the end of the end section. Moreover, The exact meaning of the phrase "a width that is greater than a diameter of said opening" (lines 14-15 of claim 2) is not clearly understood as to how the "width" is greater than the diameter.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3652

5. Claim 19 is rejected under 35 U.S.C. 103(a) as being unpatentable over Collins et al. (2,628,122). In view of Hamilton (4,819,137).

Collins et al. (2,628,122) discloses a device and a method comprising an end section 30, an opening in a tubular section 16, an end cap 38, and an inductor means 42,34, and a battery, and a switch 44,46. Collins et al device does not show a subsequent tubular section. However, Hamilton (4,819,137) teaches a subsequent tubular section 24,26. Accordingly, it would have been obvious to those skilled in the art to provide another tubular on the Collins et al device as taught by Hamilton (4,819,137) providing a telescoping device. Moreover, it would have been obvious to those skilled in the art to provide a material selection (non-conducting material on the tubular section) or plastic, or other materials) on the Collins et al device not to be attracted to the adjacent metal objects.

Allowable Subject Matter

6. Claim 2 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
7. Claims 3-16 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

8. Applicant's arguments with respect to claims 2-19 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
